

SENTINEL FABRICATION LLC

Capability Statement

Industrial fabrication and managed manufacturing — Seguin, Texas

Sentinel gives Central Texas plants, contractors, and fleets a single accountable partner for small-to-mid-volume metal work — from drawing to finished, inspected part. One shop, one schedule, one point of contact.

CORE CAPABILITIES

- **Cutting & forming** — brackets, plates, gussets, signage, precision profiles
- **Machining** — precision machined components and features supporting fabricated assemblies
- **MIG / TIG welding** — mild steel, 304/316 stainless, aluminum; single parts to repeat runs
- **Weldments & assemblies** — fixtures, carts, guards, platforms, tanks, frames
- **CAD/CAM & drawing cleanup** — from sketches, samples, or field dimensions
- **Marking & identification** — laser-engraved tags, labels, and panels
- **Tool-control drawer systems** — laser-cut foam layouts built around the actual tools

WHY SENTINEL

- **One accountable owner.** One PO, one contact, one delivery — Sentinel manages the whole job start to finish.
- **Rush-capable and local.** Seguin-based, serving the I-10 / I-35 corridor. Expedite lane available for down-line and shutdown work.
- **Transparent pricing.** Every job is quoted and tracked against actual cost, so pricing stays consistent and defensible on repeat orders.
- **Made to hold up.** Parts are built for the plant floor, jobsite, or service fleet.
- **Veteran-owned.** Verified Texas veteran-owned business, led by a retired U.S. Marine with 21 years of service.

SELECTED EXPERIENCE

- **Rush fabrication for companies sourcing overseas** — expedited welded and stainless components delivered faster than shipping the part in from a foreign supplier.
- **Laser-cut, engraved stainless panels and connector plates** for industrial control and equipment customers, including rush orders.
- **Industrial and commercial equipment maintenance support** — custom brackets, guards, and fixtures built to keep production and facility equipment running.
- **Engineered tool-control drawer systems** — laser-cut foam layouts for technician and fleet toolboxes, built around each customer's actual tools.
